SPARE PARTS

It is important to regularly replace the wearing parts on your equipment in order to ensure their reliability and your product quality.

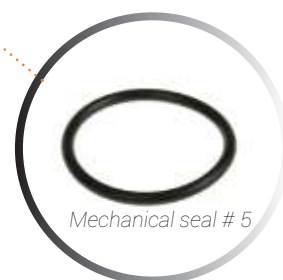

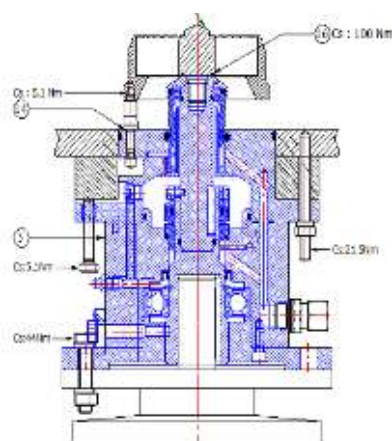

For each accessory, GEPS Services offers a spare parts list to have in your stock so that they are available when you need to carry out maintenance operations.

GENERALLY SPEAKING, WEARING AND REPLACEMENT PARTS HAVE A GUARANTEE OF ORIGIN AND ARE SUPPLIED ON REQUEST WITH CERTIFICATE :

- FDA, CE 1935/2004 – 2023/2006, USP Class VI
- Material, 3.1b type, BSE/TSE free
- Roughness (Ra)
- Factory calibration (instrumentation, probes, sensors and so on), calibration (valve)
- ATEX compliance
- Integrity (filtering cartridge, and so on....)

WEARING OR FIRST EMERGENCY PARTS :

- These parts are listed and coded numerically in a nomenclature specific to each part of your installation.
- A replacement period is recommended and helps you to schedule the first preventive maintenance.
- Maintenance is customised according to the way your equipment works

FLANGE MOTOR Ø200-MAIN SHAFT Ø28-LG.60 MECHANICAL SEAL TIGHTNESS				
Mark	Item code	Qty	Description	Change periodicity
5*	120300305	1	Mechanical seal	2000 h/12 months
