UPGRADING, REVAMPING AND MODERNISATION

After a diagnosis, an obsolescence inspection, and then a feasibility study, GEPS Services offers its knowledge regarding the upgrading and modernisation of your existing tanks and process installations, regardless of their brands.

Fitting of a stirring system

As new investments are not always easy according to the economic context, the upgrading, revamping or modernisation of your equipment is a solution which allows you to **give them added value** as far as their utilization and **reliability** are concerned.

From a financial viewpoint, it is interesting to recover tanks or process installations that are bought second-hand or which come from another site.

But are you sure that **these devices meet your requirements** in terms of safety, quality and production?

Thanks to its knowledge and more than 30 years of experience GEPS Services, team can answer your questions by **offering adapted solutions**.
