Maintenance | Inspection | Diagnosis | Revamping | Spare Parts

# TRAINING

---

You need to train your production and maintenance teams, GEPS Services can provide theoretical or on-the-job training for your production and maintenance technicians.

The topics concerned can be different among the following ones :

- The running of tanks and installation
- Maintenance
- Specific tests and diagnoses
- PED tanks follow-up
- Obsolescence inspection
- Upgrading, revamping and modernisation of existing equipment
- Safety for confined space access: descent rescue system

These training courses can be attributed to your **training budget** : Approval N°25.61.00662.61

These trainings can be provided in **France and abroad**.

*Some examples :*

**In France** : Training courses about equipment maintenance are regularly provided

A training was also carried out in pairs in USA regarding the maintenance of a mixing system on a crystallization tank :

- Theoretical part (english presentation) with an english speaking sales assistant
- Practical part at plant (handling) with a technician (translation between participants and technician by the sales assistant)
